

JPIXDB VIEWER 4.0

Bluemont Software, July 2006

This CD or DVD was made by `jPixDb`, a full-featured picture album program. This CD or DVD contains picture albums and the `jPixDb Viewer` program. No license is required to run this program or to distribute this CD or DVD. `jPixDb Viewer` will run on any computer that has Java 1.4 or above installed. Microsoft Windows XP and Apple OS X come with Java 1.4. `jPixDb Viewer` runs entirely from this CD or DVD and does not read or write any files on your hard drive. For information on `jPixDb` go to www.bluemontsw.com.

To run `jPixDb Viewer`:

- Double-click the *jpixdb.jar* file icon

or

- if you are using Microsoft Windows, run the *windows.bat* file (by double-clicking it).
- if you are using Apple OS X, run the *apple.program* file (by double-clicking it)
- if you are using eComStation or OS/2, run *os2.cmd*.

See the on-line help for details on running `jPixDb Viewer`.
