jPixDb 4.1 INSTALLATION

Bluemont Software, September 2006

INSTALLATION PREREQUISITE

The Java Runtime Environment (JRE) version 1.4 or higher must already be installed on your computer before installing `jPixDb`. The 1.4 JRE comes already installed with Microsoft Windows XP and Apple OS X. In you use Linux or eComStation, you will have to install Java 1.4 (or higher) if you have not done so already. If you do not have the required JRE, `jPixDb` either will not execute or will display a "cannot install" message.

INSTALLATION PROCEDURE

`jPixDb` is distributed as a ZIP file, *jpixdb.zip*. To install:

1. Copy *jpixdb.zip* to the folder into which you want `jPixDb` installed. `jPixDb` will be installed in subfolder *jpixdb* of this folder. `jPixDb` will not ask you for the installation folder; you must put *jpixdb.zip* into the folder into which you want `jPixDb` installed. On Apple OS X, you must be *jpixdb.zip* into your user home folder, e.g., */Users/yourname*.

2. Unzip *jpixdb.zip* (extract its files) by double-clicking its file icon. The `jPixDb` files will be extracted into subfolder *jpixdb*.

3. Go to folder *jpixdb* and execute *jpixdb.jar* by double-clicking the file icon.

4. When `jPixDb` starts, the Installation Panel will be displayed. Click the Install button it to start installation. The License Agreement will be displayed. To continue installation, click the Accept button, indicating your acceptance of the License Agreement.

5. `jPixDb` will display a confirmation dialog showing the installation folder path. Click the Accept button to do the installation. When it completes, click the Ok button, end `jPixDb` (by closing its window), and restart it. When it restarts it will add the sample albums, displaying messages as it does.

6. If you have purchased a registration key, click the registration key button and enter your key.

`jPixDb` does not install a program icon (shortcut) on your desktop. If you want one you must create it manually. `jPixDb` installs two icon images you can use for the shortcut: *jpixdb.ico* for Microsoft Windows and *jpixdb.gif* for other operating systems.

UNINSTALL

To uninstall `jPixDb`, delete the *jpixdb* folder.
